### **Springbok Services Earns Highest Level of SAS 70 Certification**

#### ***Third-Party Assurances Help Customers Meet Sarbanes-Oxley and Other Regulatory Requirements***

**ENGLEWOOD, Colo., Feb. 13, 2008** – Springbok Services Inc., a leading provider of prepaid MasterCard® card solutions, today announced it has received the Statement of Auditing Standards No. 70 (SAS 70) Type II certification. The SAS 70 Type II certification provides industry-standard assurances to Springbok Services' customers who use their secure personalization and fulfillment solutions and is awarded only after demonstrating effective operational controls and processes over an extended period of time.

Issued under guidance established by the American Institute of Certified Public Accountants (AICPA), SAS 70 Type II assurance means that Springbok Services' infrastructure and processes have passed rigorous, third-party testing and have independently validated that processes and controls are in place to effectively exchange customer corporate and financial information. Many companies require credible proof that service providers have the measures in place to provide a stable and secure environment that can safely exchange customer data - SAS 70 helps provide that proof.

"With completion of SAS 70 Type II audit, Springbok Services customers can be assured that our services are consistent, safe and reliable," said Terry Zinsli, chief financial officer of Springbok Services Inc. "Today, companies seeking or using financial business solutions providers should expect their third-parties to perform to the highest standards possible. Springbok Services will continue to pursue annual examinations to ensure our offerings exceed customer needs while allowing for safe and secure exchange of critical data. SAS 70 is the benchmark for the best companies in the industry, and we're very excited to receive this certification."

Primarily intended for financial auditors of companies using service providers, the SAS 70 Type II report contains information needed to thoroughly understand the service providers' internal control environment and their level of compliance with those controls.

To obtain similar assurance without a SAS 70 examination, customers would have to send their own auditors to a service provider to conduct individual reviews. Springbok Services' SAS 70 certification helps customers avoid individual auditing and provides immediate results as the procedures have already been performed.

Separately, MasterCard issued Springbok Services Inc. an Inspection Report with a Certified rating, providing information about the strength of Springbok Services' physical, logical, administrative and technical controls to ensure the confidentiality and integrity of customer data.

In a highly competitive market, Springbok Services demonstrates its dedication to the individual needs of their enterprise customers by offering services backed by comprehensive service level agreements (SLAs) and reliable third-party assurances. By completing the SAS 70 certification process, Springbok has joined a very elite group of business solutions and service providers that deliver the highest level of assurance for their customers.
